San Fr neisco's Suspected Case Proves to Be Gennine.

Precautions Taken by the Marine Hospital Service to Prevent an Epidemic-Dr. Wyman Not Alarm- & Co., plumbers and sanitary engineers,

it is thought that it came through the use of cheap food products from infected dis-

the owners to land their cargo of coffee from the infected vessel followed. With the exception of an infected ship, which was under strict quarantine at Port Townsend no other cases of the plague have been reported nearer our shores than Hon-

olulu.

One reason given for the absence of alarm among the Marine Hospital officials is the well known rigidity of the quarastine regulations of the United States and the excellent results obtained in plague cases by using the anti-serum, a discovery of Dr. Fasteur, of the Pasteur Institute in Paris, it is easily that it may instance be. Paris. It is said that in no instance has it failed to cure when used in the early stages of the disease and in sufficient quan-

In Honolulu United States Marine Hospital Surgeon Carmichael has used the serum in six cases of genuine plague. Five re-covered and the other resulted fatally.

overed and the other resulted fatally.

Dr. Wyman, in a letter to Surgeon Carmichael, explains that the Brard of Health in Honolulu should have used the serum in larger quantitles in the case which proved fatal. Dr. Wyman is of the opinion that this would have saved life. He also cays that much larger doses of the serum should be used than heretofore, especially during the first forty-eight hours of the disease.

especially during the first forty-eight hours of the disease.

The plague situation throughout the world, and especially in Honolulu, is greatly improved, according to reports received at the Marine Hospital. In a letter to Surgeon General Wyman, under the date of February 24, Surgeon Carmichael says that no new cases of the plague in Honolulu have been reported since March 29. One case of pneumonia type, he says, was discovered in the detention camp at Kahulin, on February 15, and was fatal on February 17. There are no new cases in the town, and none is reported from Hilo, Hawaii.

### WALKER TELLS HIS STORY.

Testifies That He Killed Shorter in Self-Defence.

The trial of Talmadge Walker, alias Thomas Walker, colored, charged with the murder of Hamilton Shorter, also colored, was resumed today before Justice Clabaugh. Very soon after the court convened, the Government's case was closed and the defence was begun. A number of witnesses were called to testify to the defendant's reputation for peace and good

The defendant was then called and he told the story of the crime from his point told the story of the crime from his point of view. He said that he and Shorter and others came into the city on a wagon, and stopped at a saloon at the corner of Fourth and Q streets where they all began drinking. Shorier, the witness said, became angry because he refused to pay for a drink for him. He also stated that the deceased threatened to "break off a knite". ceased threatened to "break off a knife" in him and a few minutes after that Shorter struck him on the head with a bottle.

After this, Walker said, the party got back into the wagon and started away.

They had not gone far before Shorter re-newed the quarrel and stated that he was not yet done with the witness. Walker testified that he believed that Shorter was in the act of taking a knife from his pock-et to cut him when he picked up a piece of wood and struck him two blows on the Walker said that after doing this he

of cheap food products from infected districts.

The alarm expressed in some quarters that America's shores would be visited by the scourge has not been felt by Surgeon General Wymau, of the Marine Hospital Service, and his staff. The first intimation that such a calamity was possible came with the announcement that the captain of an English vessel sailing from Brazil was ill with the disease. His vessel at the time was quarantined in New York harbor.

A long discussion between the New York State and Federal quarantine authorities relating to the advisability of permitting the owners to land their cargo of coffee from the infected vessel followed. With
